

Imes Ltd is an international engineering company providing engineering services and systems which enable our customers to maintain the capability and availability of cranes, lifting equipment and specialised structures. Key industries in which Imes operate include oil & gas, renewables, marine and defence.

Mechanical Engineers

We currently have a requirement for Mechanical Engineers able to apply engineering principles to provide efficient solutions to the development of processes and products, ranging from small component designs to extremely large inspection equipment.

Key Tasks:

- Estimate and execute discipline engineering activities to provide reliability and throughput improvements within budget and schedule whilst maintaining technical integrity and complying with HS&E values
- developing project specifications, testing and evaluating theoretical designs;
- managing projects using engineering principles and techniques;
- recommending modifications in the light of prototype test results;
- using research, analytical, conceptual and planning skills, particularly mathematical modelling and computer-aided design;
- monitoring and commissioning equipment and systems
- Bid evaluation
- Supervision of technical discipline engineering team
- Technical focal point for internal and external customers
- Engineering drawing and datasheet preparation
- Preparation of technical quotation for Purchase Order Requisitions and vendor document review.

Requirements

Would suit candidate educated to degree level in Mechanical Engineering or equivalent with previous engineering experience in a similar role within the Oil, Gas, Marine or Defence sector.

To apply, please send your CV to: careers@imes-group.com. Whilst every effort is made to provide feedback on applications, if you have not received a response by Friday 7th November 2008, unfortunately your application will not be taken forward. We thank you in advance for your interest in Imes Ltd.
