Imes provides a range of integrated support packages to clients seeking to maximise value from existing assets. From statutory compliance through to safety assurance, Imes can provide the necessary products and services to maintain asset integrity.

Imes has over 40 years experience serving the oil and gas industry through delivery of products and services that preserve and extend the life of safety critical assets.

delivering high quality inspection, monitoring and integrity services to our clients, including:

- Acergy
- Aker Kvaerner
- Amec
- Amerada Hess
- Apache
- BHP Billiton
- BP
- BP Chemicals
- CAN
- iicorr
- KCA Deutag
- Oceaneering
- Shell
- Subsea 7
- Talisman
- Technip
- Wood Group
- Woodside

From subsea engineering systems, to topside inspection services, Imes has a wide portfolio of products and services to support integrity of assets in the oil and gas industry.

With its operational bases and channel partner network across the globe, Imes has competent technical personnel to deliver solutions direct to its customers' operations.

The objective is clear. Assist our clients to maintain operational safety, achieve statutory compliance and reduce cost.

WHAT WE DELIVER

TECHNICAL ADVISORY SERVICES

- specialist advice on lifting equipment regulatory compliance
- design review services to support procurement of new lifting equipment assets
- development of written schemes to support risk-based inspections on cranes and other complex mechanical handling systems
- accident investigation and anomaly resolution
- enterprise of competence for cranes and lifting equipment

MANAGED SERVICES

Imes supplies a range of integrity management services to support operators, marine contractors and engineering houses to attain equipment compliance and optimise safety and availability. Services include:

- development of strategies and management systems
- development and implementation of written schemes of examination
- inspection enactment
- supply of NDT services
- competency assessment
- data management systems
- lifting equipment certification management systems
- offshore equipment test and recalibration
- IRATA qualified inspection engineers
- equipment installation and removal

SYSTEMS ENGINEERING

Imes designs and installs a range of monitoring systems to support oil and gas clients operating across the globe. From development of novel sensor technologies through to custom software solutions, Imes can deliver solutions for:

- crane load monitoring
- anchor line monitoring
- riser load monitoring
- subsea load monitoring
- drilling load monitoring
- weighing platforms
- intrinsically safe systems
- data alarm and logging systems

TRAINING

Imes design, develop and deliver a range of training and mentoring programmes onshore and offshore to enhance competencies of technical and management personnel in areas such as:

- lifting equipment operation
- lifting equipment examination
- regulations and compliance (eg LOLER)
- competency assessment

Through a range of accredited courses, Imes delivers training solutions from short-term individual modules through to industry-recognised qualifications.
